PROFESSIONAL SUMMARY

Results-driven Mid-Level Full-Stack Software Engineer with a strong product-ownership mindset. Experienced in managing the complete software lifecycle—from analyzing business requirements and system design to end-to-end feature implementation and deployment. Highly adept at integrating external systems, complex payment gateways, and third-party AI services. Actively leverages advanced AI tools (Claude Code, Cursor, GitHub Copilot) as daily thinking partners to optimize performance, accelerate development, and ensure secure, clean code architecture. Proven track record of delivering scalable AI-powered solutions, conversational workflows, and enterprise-grade platforms in fast-paced startup environments.

EXPERIENCE

Stitch

Aug 2025 – Present

Full-Stack Developer / Product Owner (Hybrid)

Heliopolis, Cairo

- **WhatsApp & AI Chatbot Solutions:** Transitioned to the messaging team to engineer interactive WhatsApp Flows, targeted campaigns, and AI-driven chatbots for enterprise real estate giants including Emaar, SODIC, TMG, El Gouna, and Town Writers.
- **Client Dashboards & Analytics:** Built dedicated Laravel/React dashboards integrated directly with WhatsApp services, empowering clients to monitor AI chatbot interactions, survey responses, and user analytics in real-time.
- **Tali Platform Evolution (V1 to V3):** Initially stabilized a legacy PHP/jQuery RSVP platform, ensuring zero downtime for live users. Led the V2 rebuild using Laravel and React, integrating a Gemini-powered AI assistant utilizing strict documentation-based prompts to safely answer user queries without exposing core databases.
- **System Scalability (V3):** Spearheaded the transition to a comprehensive event and restaurant ticketing system using Nest.js (backend) and React. Architected and developed over 60% of this core system, which currently serves major GNK Group clients (Kikis, Samara, Mazeej, Human Figures, byGanz, Club M House, Stanley).

Dyno Tech

Mar 2025 – Jul 2025

Full-Stack Developer (Hybrid)

Tanta, Egypt

- Led the end-to-end implementation of robust RESTful APIs using Laravel and MySQL, powering web and mobile applications across 5+ active client projects.
- Integrated seamless third-party services including complex payment gateways and external APIs, ensuring robust data synchronization and high availability.
- Architected role-based access control with Laravel Sanctum, securing multiple user roles, and optimized database queries to eliminate critical N+1 bottlenecks, reducing API response times by 30%.

DeveTechno Company

Apr 2024 – Feb 2025

Full-Stack Developer (On-site)

Tanta, Egypt

- Engineered the complete API layer for multiple mobile applications, taking full ownership of features from backend architecture to frontend integration requirements.
- Established SOLID principles and Clean Architecture standards across the codebase, ensuring modularity and facilitating easier integration with external services and cloud functions.
- Integrated Firebase Cloud Messaging for real-time push notifications, significantly reducing backend server load and improving end-user engagement.

TECHNICAL SKILLS

Backend: PHP, Laravel, Nest.js, Redis, RESTful APIs, Filament, C++, SQL, Payment Integrations, Swagger, JWT, Firebase

Frontend: JavaScript, TypeScript, React, Next.js, jQuery, HTML, CSS, Ajax, Tailwind CSS, Bootstrap, MUI

AI Tools & Integrations: Claude Code, Cursor, GitHub Copilot, Gemini API, OpenAI, Prompt Engineering

Messaging & Payments: WhatsApp Business API, WhatsApp Flows, AI Chatbots, Stripe, Paymob, Geidea, Paytabs

Databases & DevOps: MySQL, PostgreSQL, Schema Design, Indexing, Migrations, Query Optimization, Git, GitHub, GitLab, Docker, CI/CD, Jira, Postman

Architecture: OOP, Data Structures, Algorithms, System Design, Design Patterns, SOLID, MVC, Clean Architecture, Agile, Unit Testing

PROJECTS

- Enterprise AI WhatsApp Services | *Laravel, React, Generative AI, WhatsApp API*

2026

- Engineered scalable AI-powered WhatsApp chatbots and dynamic conversational flows for top-tier real estate developers (Emaar, SODIC, TMG, Town Writers, El Gouna, Al Ahly Sabbour).
 - Developed private client dashboards to visualize chatbot interactions, extract survey data, and analyze user engagement.
 - Implemented generative AI fallbacks to intelligently handle out-of-flow user messages, drastically improving UX.
- Tali Events & RSVP Platform | *Nest.js, Laravel, React, Gemini AI* [V1] | [V2] | [V3]

2025 – 2026

- Progressively re-engineered the platform across three major iterations, transitioning from a legacy Native PHP architecture to a modern Laravel/React stack, and ultimately to a highly scalable Nest.js ecosystem.
 - Integrated a context-aware Gemini AI chatbot using secure, file-based prompt engineering to assist users without exposing sensitive database architectures.
 - Delivered comprehensive dashboards to manage complex event logistics, ticket QR validation, and restaurant reservations.
- PNT Delivery Platform | *Laravel, MySQL, REST APIs, Blade* [Live]

2025

- Architected the backend for a multi-tenant delivery management system, featuring role-separated interfaces for drivers and customers with real-time task assignments and automated tracking.
- Abtalna Job Platform | *Laravel, MySQL, REST APIs* [Live]

2025

- Designed a robust API infrastructure for a Flutter-based job marketplace, supporting seamless job discovery, application workflows, and operational control panels for company management.
